The ACCENT is available in two types of mounting boxes: narrow and high, as a result, lamps could be completely hidden or focused from outside. Both versions are available in trim and trimless versions. This fitting offers enough space for different modules being able to point at different directions, all from within the same hole in your ceiling, making it very discreet. . Intended in the first place to be functional lighting, this contemporary design pokes a little fun at its surroundings at the same time. The black background in the fitting creates the illusion of an unfathomable unendingness around the light source. The magnetic mounting of the modules makes it easy to quickly adapt the lighting to a new setting.
