The square  shape WALL comes in many different models, but they all have one thing in common: its quite small tubular shape is what defines this range of lighting fixtures. Whether in single use or accompanied by another cylinder to make it directional, this one is always a beauty. WALL comes in many playful finishing colours. To complete the range, up and down versions are available for choice. In addition, any lamp can be equipped by different optical accessories  in order to create unique lighting patterns on the wall.
